DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to an article with a movable element portion, classified in class 385, subclass 17.
- II. Claims 22-26, drawn to a method of manufacturing an optical element, classified in class 438, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article as claimed can be made by mechanical abrasion, ion machining, or cutting and gluing pieces together, instead of patterning and etching.

A telephone call was made to Charles W. Gaines on 2/21/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
